## ALLIED HEALTH

This degree program for health care professionals provides the opportunity to complete a bachelor's degree based on prior education in nursing or other health care training, and professional experience. Doane recognizes that the academic, clinical, and professional experiences of persons in the health care profession constitute the foundation for the bachelor of arts degree in health care. Documentation of in-service learning and professional practice, along with formal professional education provides a sound basis for further study. Completion of degree requirements involves courses in the liberal arts and electives in areas of interest.

### TO BE ADMITTED TO THE PROGRAM:

- An individual must have a three-year diploma from a school of nursing and provide documentation of two full years of professional practice as a registered nurse
- or**
- An individual must have a two-year associate degree (or diploma) in a health care profession and three full years of employment as a health care professional (or the part-time equivalent), and
- The validating professional work must have been done within the last three years, and
- Registration as a certified/licensed professional must be current.

### TO GRADUATE FROM THE PROGRAM:

- Students must earn a minimum of 132 credits, with a cumulative grade point average of 2.00 (C) or better.
