Grading Standards

The text below defines the outlines of the standards for the grades of A, B, C, D, and F, in my classes at Doane College.

A implies excellence in written and oral presentation, performance, attendance, discussion, class participation and attitude. It is the highest level of professionalism in my classes. The work is, on the whole, not only clear, precise, and well-reasoned, but insightful as well.

B implies above average in written and oral presentation, performance, attendance, discussion, class participation and attitude. It is the next level of professionalism in my classes. The work is, on the whole, not only clear, precise, and well-reasoned, but does not have the depth of insight.

C implies average in written and oral presentation, performance, attendance, discussion, class participation and attitude. It is the next assessment level in my classes. The work is, on the whole, inconsistently clear, precise, and well-reasoned, and does not have the depth of insight or even consistent competence. This level of work is not acceptable for consideration for continuation in either undergraduate or graduate courses.

D implies below average work in written and oral presentation, performance, attendance, discussion, class participation and attitude. It is the next assessment level in my classes. On the whole, the student tries to get through the course by means of rote recall, attempting to acquire knowledge by memorization rather than through comprehension and understanding. The work is also inconsistently clear, precise, and well reasoned, and does not have the depth of insight or even consistent competence. This level of work is not acceptable for consideration for continuation in either undergraduate or graduate courses.
F implies unacceptable work in written and oral presentation, performance, attendance, discussion, class participation and attitude. It is the next assessment level in my classes. On the whole, the student tries to get through the course by means of rote recall, attempting to acquire knowledge by memorization rather than through comprehension and understanding. The work is also inconsistently clear, precise, and well reasoned, and does not have the depth of insight or even consistent competence. This level of work is not acceptable for consideration for continuation in either undergraduate or graduate courses.

Caveat: Due to the constructivist nature of this course the above schedule and procedures are subject to change in the event of extenuating circumstances.
